

# What is the tire pressure for a Smart car?

Correct tire pressure ensures safety, fuel efficiency, and smooth handling.

Tire pressure varies by Smart car model, year, and load.

Fortwo Standard: Front 29–33 PSI, Rear 32–36 PSI.

Fortwo Coupe: Front 30–34 PSI, Rear 33–36 PSI.

Forfour Standard: Front 30–32 PSI, Rear 32–35 PSI.

Forfour Electric: Front 32–34 PSI, Rear 34–36 PSI.

Convertible / Coupe: Front 31–33 PSI, Rear 33–36 PSI.

Check tire pressure when tires are cold.

Adjust PSI based on passenger and cargo load.

Inspect tires regularly for wear, cracks, or damage.

Follow the owner's manual or tire placard for exact specs.

Maintaining correct PSI is key for long-term tire life and vehicle performance.
